

Bluefish444 release IngeSTore 2.0 Windows 11 multichannel recording software for Epoch & KRONOS video cards

03 June 2026

Multichannel SDI/ST2110/HDMI/NDI Recording for Live Production & VTR archival

North Melbourne, Australia, June 3rd, 2026 – Bluefish444, manufacturer of the professional video industry’s highest-quality uncompressed video interface cards has released IngeSTore 2.0 Windows 11 multichannel recording software for live production and VTR archival workflows.

New features include:

- Support for the KRONOS range of video cards
- Support for the KRONOS Optikos3G Interchangeable video interface between SDI/ST2110/HDMI explained [here](#)
- Choice between SDI/ST2110/HDMI/NDI recording
- Increasing the recording channel count from 4 to 8 channels
- Playthrough of SDI/ST2110 recordings to an external monitor for live QA
- Duplication of live input signals for recording two or more formats from a live input
- Three UI layout options; multiview, split view and full screen
- Significant updates to the Media Bin layout and reporting
- Audio monitoring bars measured in dBFS to avoid clipping and distortion
- Recording chunks of video according to time
- Support for Windows11

What’s new in IngeSTore 2.0 has been released as a promotional video [here](#) to demonstrate each of the new features.

IngeSTore 2.0 is available as a two, four, six or eight channel customisable turnkey video server, or, as a per channel license attached to an individual Epoch or KRONOS video card.

IngeSTore 2.0 runs as part of the Bluefish444 Windows installer package 2026.14.1 that can be downloaded [here](#). A free version of IngeSTore 2.0 with can be downloaded for all Epoch and KRONOS cards [here](#).

“The power of IngeSTore 2.0 is that it writes the same production, archival or streaming format regardless of whether the video input is SDI, ST2110, HDMI or NDI” said Craig Mott, Managing Director. “IngeSTore 2.0 gives facilities the flexibility to use a single recording solution for four different video interfaces, including edit while record.”

IngeSTore 2.0 is immediately available through Bluefish444 authorised resellers and downloadable for free from www.bluefish444.com.

About Bluefish444

Bluefish444, known as the Professionals' Choice for over 25 years, is the manufacturer of the professional video industry's highest quality video I/O interface cards, centralised ingest appliances, live production, archival & streaming software and signal converters. Bluefish products are deployed globally throughout the broadcast, post-production, live event and entertainment, proAV, corporate, military, government, medical and education markets.

KRONOS and Epoch video cards support interfaces for 4K/UHD SDI, HDMI and Video Over IP I/O and are widely integrated by 3rd-party developers and OEMs via the cross-platform Windows and Linux SDK.

Bluefish supply the IngeSTore Server centralised ingest appliance and IngeSTore software for live production, archival and streaming workflows.

Bluefish have integrations with the biggest brands in professional video including Adobe, Avid, Drastic Technologies, Nuke, Unity, Unreal Engine, CasparCG, Vizrt, Brainstorm, ClassX, RT Software, WTVision and many more, with Bluefish video cards providing the major component of turnkey solutions for production, 2D/3D graphics, display & presentation, multimedia, QC & compliance and live event workflows.

Established in 1998, Bluefish444 is a division and brand name of Bluefish Technologies Pty Ltd, and based in North Melbourne, Australia, and its products are distributed via a global OEM, dealer and systems integrator network. Visit bluefish444.com for more information.
